

New BarnWood

by JorEl Millwork

What is New BarnWood?

- New BarnWood is a unique alternative for reclaimed wall boarding, beams, flooring, doors and exterior siding.

What is New BarnWood made from?

- We use Antique Rustic Grade White Oak for all of our New BarnWood products. Our material is properly forested and kiln dried prior to milling and finishing.

How do you finish New BarnWood to look reclaimed?

- All of our products are wire brushed to enhance the unique features in White Oak lumber and are then finished with a proprietary staining and finishing process to age & seal each board.

Can New BarnWood Wall Boarding be used outside?

- Yes! All of our wall boarding receives a base seal coat, however if our boarding is going to be used as an exterior siding, we will apply a second sealer coat.

What sizes are available for wall boarding?

- Our boards are milled to 11/16" thick and range from 7' – 12' in length. We offer three standard widths: 5", 7" & 9". If you prefer all to have your wall boarding with all the same width we are happy to accommodate. Other widths are available – just ask us!

What profiles are available?

- We mill New BarnWood into 3 standard profiles: Tongue & groove, ship lap and S4S. If you have another profile in mind – let us know... we are happy to accommodate!

How many colors are available?

- We offer 10 different finishes – see our website for photos

Will your finish be the same on each board?

- All of our finishes are generally consistent from board to board, however, each piece will have a different molecular make up and will react uniquely with our

finishes. It is normal for each piece of wood to have slight variations within each chosen finish.

Will a finish color vary from what is shown on your website?

- Each of our products possesses unique characteristics and beauty. While website photos and samples are a close representation, they are for reference only and cannot exactly match the end product.

Can I mix & match finishes on my order?

- Absolutely! Mixing finishes is the best way to get variety for your project.

Will my boards have large knots & defects?

- Yes. Antique Rustic Grade is chosen for knots, checks, cracks and waned areas. We do not fill holes or defects. We recommend ordering 10% extra material if you do not want any visible holes through your boards.

Will the face of my boards be smooth?

- No, the outer face of each board will be selected for visual defects and then wire brushed for additional depth and character. Although we profile sand our boards, there might be a sharp edge or two.

How is New BarnWood sold?

- We sell our product by the square foot.

Can I order samples?

- Yes! We offer samples at a nominal fee. They can be ordered through our website or by calling our office.

How do I get pricing for New BarnWood products?

- We have a quote form on our website or you can call our office.

What is the lead time to receive an order?

- Our typical lead time is 3 weeks. Large projects may add additional time. Each job requirement is different, so we make our product on a per job basis.
